WHO ARE WE?

Comitech S.A. was founded in 2002 in Ioannina, Greece by an enthusiastic and experienced team in the field of communication and information technology. Since then, Comitech S.A. has shown a steady growth and has established a notable presence in the fields of consulting, ICT applications & solutions and the production of multimedia content for the internet throughout Greece. Comitech S.A. is continuously seeking to expand its services abroad (Albania, Italy, Bulgaria, Cyprus)

Comitech S.A. has an active policy of continuous investments in new technologies and over the past few years has invested more than €200.000,00 in equipment and know how in the fields of 360° video, book scanning and voice portals.

Comitech S.A. is dedicated to the continuous improvement of the quality of the services provided, and is certified according to the international standard ISO 9001:2008 for all of its activities.

OUR FIELDS OF ACTIVITY

DEVELOPMENT OF WEB-BASED APPLICATIONS

Comitech S.A. designs and implements all kinds of web-based applications to cover the needs of a multitude of potential users. Our services include the development, maintenance and hosting of web sites and web portals, databases, e-commerce applications, e-learning applications, voice portals, Geographical Information Service (GIS) applications, geo-referenced multimedia applications.

SOFTWARE APPLICATIONS

Comitech S.A. designs and develops complete information systems and custom applications according to customer needs. These applications can include "intelligent" management systems and databases.

DIGITISATON SERVICES

Comitech S.A. has invested in high quality and specialized equipment for the digitization of all kinds of archives (books, manuscripts, pictures, videos, music, slides etc.). Our services include digital cleaning – filtering – corrections – watermarking where necessary.

MULTIMEDIA CONTENT FOR THE INTERNET

Modern web sites, mobile applications and even social media marketing campaigns stand out through the quality and range of their original multimedia content. **Comitech S.A.** is the market pioneer in S.E. Europe in the production of multimedia content in 360°. Comitech produces a full range of original (and when required, geo-referenced) multimedia content for the internet, for mobile, GIS and map-based applications including:

- **360° Immersive Videos**

  See the world as you want to see it and not how the cameraman chooses. Immersive video technology is ideal for the coverage of large events (sports, cultural, social), the promotion of locations and establishments of tourist and cultural interest, the coverage of news and interactive documentaries. Combination with GPS and GIS technologies provides a huge range of add-on applications.

- **Panoramic Photography (360° Panoramas & Virtual Tours)**

  Give your web visitor the opportunity to navigate around your establishment – region with high quality photo panoramas and virtual tours in 360°. Virtual museums and virtual navigations

- **Professional Photography**

  Have your products, premises, region, photographed by professional photographers.

- **Gigapixel Photography**

  Create Gigapixel photographs of sceneries, buildings or even selected important objects (e.g. paintings)

- **Conventional & 3-axis time-lapse videos**

  Create a professional presentation or advertising video using state of the art techniques including 3-axis time-lapse scenes.

- **Aerial multimedia content**

  With our specialized drones and telescopic equipment we are able to provide high quality aerial imaging including aerial photography, aerial video, aerial 360° panoramas, and aerial 360° video.

- **Object Movies**

  Object movies provide a great way to interactively display selected objects of interest such as products in your e-shop, or exhibits in a virtual museum.

- **3D Animations**

  Create a 3D Animation promoting your company, region, or even the local history and culture.
